Society is working with District Animal Husbandry Department to treat Street dogs and cows. Society has rescued & treated more than 14,000+ Dogs and cows in Jalgaon, Nandurbar District's respectively and also Akola City Jurisdiction.

Organization's Vision & Mission:

Vision:

Education Sector:

- To create a world where the welfare and rights of all animals are respected, protected, and prioritized, fostering compassion, empathy, and responsible stewardship among humans towards all sentient beings."

Highlights of the Year :

Advocacy and Education: Implement comprehensive educational programs aimed at raising awareness about animal welfare issues, promoting empathy, and encouraging responsible pet ownership and wildlife conservation.

Rescue and Rehabilitation: Establish and support rescue centers and shelters to provide refuge, medical care, and rehabilitation for abused, abandoned, and injured animals, with a focus on rehoming and fostering initiatives.

Collaboration and Partnerships: Forge partnerships with governments, NGOs, academia, businesses, and local communities to leverage resources, expertise, and influence in addressing systemic issues affecting animal welfare and fostering positive change.

Global Outreach: Extend support and assistance to regions and countries facing significant challenges in animal welfare, including disaster relief efforts, capacity-building programs, and international collaborations to address global issues such as wildlife trafficking and habitat destruction.

Animal Control and Shelter Management: Partner with municipal authorities to improve animal control services, including stray animal management, rescue operations, and shelter facilities. Work together to enhance the capacity and quality of animal shelters, ensuring proper care, sanitation, and adoption programs.

Public Awareness Campaigns: Collaborate on public awareness campaigns to educate the community about responsible pet ownership, the importance of spaying/neutering, vaccination drives, and the prevention of animal cruelty. Utilize municipal communication channels and community

Policy Development and Enforcement: Work closely with municipal policymakers and law enforcement agencies to develop and enforce animal welfare regulations and bylaws. Advocate for the inclusion of animal welfare considerations in urban planning, land-use policies, and development projects to mitigate human-animal conflicts and promote coexistence.

Data Collection and Reporting: Collaborate on data collection, monitoring, and reporting mechanisms to track animal welfare indicators, including stray animal populations, adoption rates, cruelty cases, and vaccination coverage. Use data-driven insights to inform policy decisions, resource allocation, and targeted interventions for improving animal welfare outcomes.

Funding and Resource Mobilization: Explore opportunities for joint funding proposals, grant applications, and resource-sharing arrangements to sustain and expand animal welfare programs and services. Advocate for budget allocations and earmarked funds within the municipal budget for prioritizing animal welfare initiatives and infrastructure improvements.

Projects :

ANIMAL BIRTH CONTROL CENTRE'S

The Animal Birth Control Centre aims to address the issue of stray animal overpopulation in the community through a proactive and humane approach to birth control. By providing accessible and affordable sterilization services for stray and owned animals, the project seeks to reduce the number of unwanted litters, mitigate human-animal conflicts, and improve the overall welfare of animals in the area.

Sterilization Services: The centre will offer high-quality spaying and neutering procedures for dogs, cats, and other stray animals. These surgeries will be performed by qualified veterinarians using safe and humane techniques to prevent unwanted pregnancies effectively.

Outreach and Education: Implement outreach programs to raise awareness about the benefits of sterilization, responsible pet ownership, and the importance of population control in reducing stray animal populations. Conduct educational workshops, community seminars, and door-to-door campaigns to engage with residents and promote behavior change.

Data Collection and Monitoring: Establish a comprehensive data collection and monitoring system to track the number of sterilizations performed, demographic information of animals served, impact on stray animal populations, and other relevant metrics. Use data analysis to evaluate the effectiveness of the program, identify areas for improvement, and inform future decision-making.

Sustainability Strategies: Develop long-term sustainability strategies for the Animal Birth Control Centre, including fundraising initiatives, grant applications, partnerships with local businesses, and income-generating activities such as pet licensing fees or merchandise sales. Explore opportunities for expansion, replication, and scaling of the project to reach more communities and maximize impact.
